Mr. G

Co. Dublin.

Dear G

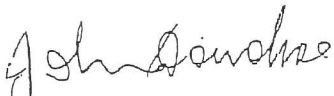

I am glad to hear that you are proceeding to gastric banding for weight control. I hope it will be extremely successful.

As regards your new kidney, the operation or anaesthetic should not have any adverse reaction whatever.

At the end of the day, once you have successfully controlled your weight, it will be very good for the longterm success of your kidney transplant.

With warm personal regards and best wishes.

Sincerely yours,

Dr. John Donohoe
